

CB SERIES MANUAL CHAIN HOIST & TS SERIES TROLLEY

KITO MIGHTY *Model M3*

KITO Manual Chain Hoists CB Series - Up to 50 ton Standard Capacity

KITO MIGHTY Model M3 incorporates state-of-the-art design and technology to provide superior performance. Lighter and more compact than others in its class, yet highly efficient, this hoist spares nothing when it comes to lifting power.

With capacities from 0.5t to 50t, the Model M3 shines in a wide range of lifting applications.

Helping to set this hoist apart is the use of KITO's smallest yet strongest load chain.

This load chain has a breaking strength of 1,000N/mm² (100kgf/mm²).

KITO's exclusive process technology and years of experience assure superior quality and performance.

With its impressive array of features and benefits,

we are confident the Model M3 will meet your most demanding needs.

**Best Design
Highest Efficiency
and Reliability
KITO MODEL M3**

Outstanding features

A high-strength load chain and a dry-type braking mechanism combine with a highly-efficient compact design to provide smooth and reliable operation and outstanding performance

KITO MIGHTY

Model M3

features

10 Important Features Of “KITO MIGHTY Model M3” Chain Hoist

1 **Gear Case and Hand Wheel Cover are Resistant to External Shocks**

Both sides of the hoist are covered with a thick steel gear case and reinforced wheel cover. Manufactured using state-of-the-art technology, these critical components are ideally shaped and highly rigid to maintain bearing alignment and withstand external shock.

2 **Double Enclosures Protect Against Rainwater and Dust Intrusion**

The braking mechanism, comprising the heart of the hoist, is securely enclosed within the wheel and brake covers. This double coverage protects the internal mechanisms from intrusion by weather elements, mud and dust. Further, the hand chain guide attached to the wheel cover provides durability and a smooth operation of the hand chain on the hand chain wheel.

3 **Double Pawl Spring Mechanism Increases Safety and Reliability**

The MIGHTY M3 insists on two pawl springs to deliver an extra degree of performance in case one spring is damaged.

4 **Sure and Reliable Mechanical Brake**

KITO's dry-type asbestos-free mechanical brake ensures outstanding stopping power and safety for high performance operation.

5 **Hooks for Easy Work**

Heat-treated to withstand the rigors of the toughest jobs, the MIGHTY M3's top and bottom hooks are ready to make your work easier. The bottom hook's relatively large dimensions enable a load to be quickly stabilized in the proper position while the bottom yoke's protecting guard protects the chain pin and nut from damage, further enhancing safety.

6 **Bearing Mechanism Increases Mechanical Efficiency**

KITO's unique ball and needle bearings optimize mechanical efficiency and produce high power output with a minimum of manual input.

7 **Load Chain Guide Mechanism Smooths Operation**

Superior performance is designed into the MIGHTY M3. Smooth load chain movement is facilitated by having a chain guide mechanism in the flanged load sheave and guide roller.

8 **Highly Accurate and Durable Gears**

Years of research and development have enabled KITO to produce compact, highly efficient and durable gears.

9 **Stopper Prevents Excessive Lowering**

KITO's carefully engineered stopper assembly not only prevents a load from being lowered too far, but even keeps the chain from exiting the mechanism. Increased pull force signals the operator the load has been lowered to the maximum extent.

10 **Highly Strong Load Chain**

Load chains, the component comprising the heart of the chain hoist, are made of an exclusively developed, heat treated special steel alloy. Carefully selected special steel is entirely processed at KITO's fully automated production facilities under the most stringent quality control. Thus, all of the KITO chains are uniform in high breaking stress of 1000N/mm²(100kgf/mm²). They have excellent quality including toughness and resistance to wear and corrosion.

- Any lift of chain is available upon request.
- As Kito chains are heat treated, splicing of the load chain is prohibited. In case longer lifting height is required, specify required lifting height when ordering.

■ Operating environmental conditions

Operating temperature range -40°C to +60°C	Operating humidity range Use the hoist at under 100%RH. This product cannot be used in water.	Materials Standard materials are used. Special materials such as sparkless materials and asbestos are not used. With regard to the environmental load substances, 6 substances defined in the RoHS directives are not contained in this product.

SMOOTH AND RELIABLE OPERATION

Bumpers & Buffers

KITO's TS Series Trolleys have bumpers, which hold trolley surely on the beam and guard against damage to a trolley and wheels arising from a collision with the stopper or between two trolleys. Buffers are available as option to install on the bumpers. Also, extended arms are available as option to install on the bumpers to help prevent damage to a hoist from collision between the hoists suspended from trolleys on the same beam.

Buffer is prepared as option.

Accommodates a Wide Selection of Beam Widths

Trolleys are adjustable for various widths of both tapered and flat flanges by changing the adjustable spacers. They can also fit on beams of up to 305mm-flange width by replacing the suspension shaft, spacers and associated parts.

Light and Compact Models

KITO's years of trolley design experience make it possible to produce these light and compact trolleys.

Improved Track Wheel Durability

KITO's unique press process and heat treatment ensure high track wheel strength, leading to improved reliability and performance.

Specially Contoured Wheels Provide Security

This trolley maintains secure contact between wheels and flange surfaces even under highly variable load weights thanks to the carefully designed contours of the steel trolley wheels.

Pivot Mounted Side Plates Ensure Even Weight Distribution

Both side plates are pivot mounted so that trolleys can move freely at adequate angles to the flange surface in spite of welded joints that might otherwise cause uneven weight distribution on the four wheels.

Ball Bearing Wheels Offer High Performance

High-grade, zero-lubrication sealed ball bearings are used on all wheels for smooth and reliable operation.

20	—	TSG200	150 to 220	—	221 to 305	∞	—	265	4.5					

Figures in () are for TSG005. •: W20 and W30 mean 203 and 305mm flange width adjustability as option.

•In case of 7.5t and over capacity, trolley wheels for tapered flange are standard. Wheels for flat flanges are available as option. If you prefer wheels for flat flanges, please specify it in advance.

•In case of only straight I-beam, 0.5ton plain trolley can be used on 57mm and less width beam and 1ton plain trolley and geared trolley can be used on 73mm and less width beam and 2.5 & 3ton plain and geared trolley can be used on 89mm and less.

KITO MANUAL CHAIN HOISTS

OPTIONAL EQUIPMENT

Overload Protection Device (OLL)

The hoist overload limiter protects the hoist mechanism from damage due to overloading. When an overload is applied to the hoist, the overload limiter actuates to stop lifting.

Corrosion Resistant ND Chain

We recommend chain hoists with ND (Nickel Diffused) chain when outstanding corrosion resistance is required. These chains are especially suited for use at work sites under the strong influences of rain and seawater, corrosive vapors and chemicals, etc. Because ND chains are manufactured by applying a unique osmotic-diffusion treatment to special metals using KITO's exclusive technology, they are extremely resistant to corrosion and are immune to peeling of the nickel-plating. Please

consult with your nearest KITO distributor prior to purchase to ensure the correct ND chain selection as the corrosion resistance efficiency varies according to the environmental chemicals at the application worksite.

Hoist with Extended Hand Wheel Shaft

When worksite conditions necessitate operating a hoist at a distance, the extended hand wheel shaft provides added convenience. The standard length of the extended shaft is 1 m.

Trolley for Small Radius Curved Beams

Small radius curve trolley operation is available upon request by removal of the protective lug. Please consult with your nearest KITO distributor for details.

Rated Load (W.L.L.)(t)	Std. flange width (mm)	Min. radius for Curve (mm)
0.5	74 to 127 (58 to 102)	450 (350)
1	74 to 127	450
2	82 to 153	550
2.5	90 to 153	650
3	90 to 153	650

Figures in parentheses show data for the plain trolley.

Spark Resistant Hoist

KITO produces special spark-resistant chain hoists for use on worksites where spark protection is required. Please consult with your nearest KITO distributor about the specific needs of your worksite.

Chain Container

In situations where the load chain on the no-load side is a hindrance when the load is raised, the load chain can be kept in a chain container attached to the chain hoist. Both steel and canvas chain containers are available upon request.

Rail Clamp Device

A rail clamp prevents a manually-operated trolley from traveling by itself. Activated by manipulating a hand chain, the trolley rail clamp is convenient when fixing a trolley at a pre-set position, such as in a rolling and pitching ship or in a sloped tunnel.

Large Capacity Chain Hoist

Chain hoists with lifting capacities up to 100 tons are available upon request.

High Speed CB

Speedy lifting and lowering!
Automatic high & low speed change!

2.5 to 50 t

Stress-free 7:1 Lifting Speed! High Speed CB is just released!

Succeeded in no-load high-speed operation

With originally developed automatic high/low-speed clutch technology,
KITO has realized no-load seven times lifting speed.

This gear shows outstanding durability in continuous and
long-term use though it is small size.

Operability in a loaded condition is as high as the standard specifications.

Relieved from past stress, a worker can smoothly prepare for his field work.

Unique Industry Innovation!

Equipped with automatic speed change gear in no-load.
